Glanz Journey

DS Glanzsche[1]

Finance Bishop, AliceGard
Valhalla 1882 (Valhalla Projection, Yukon)

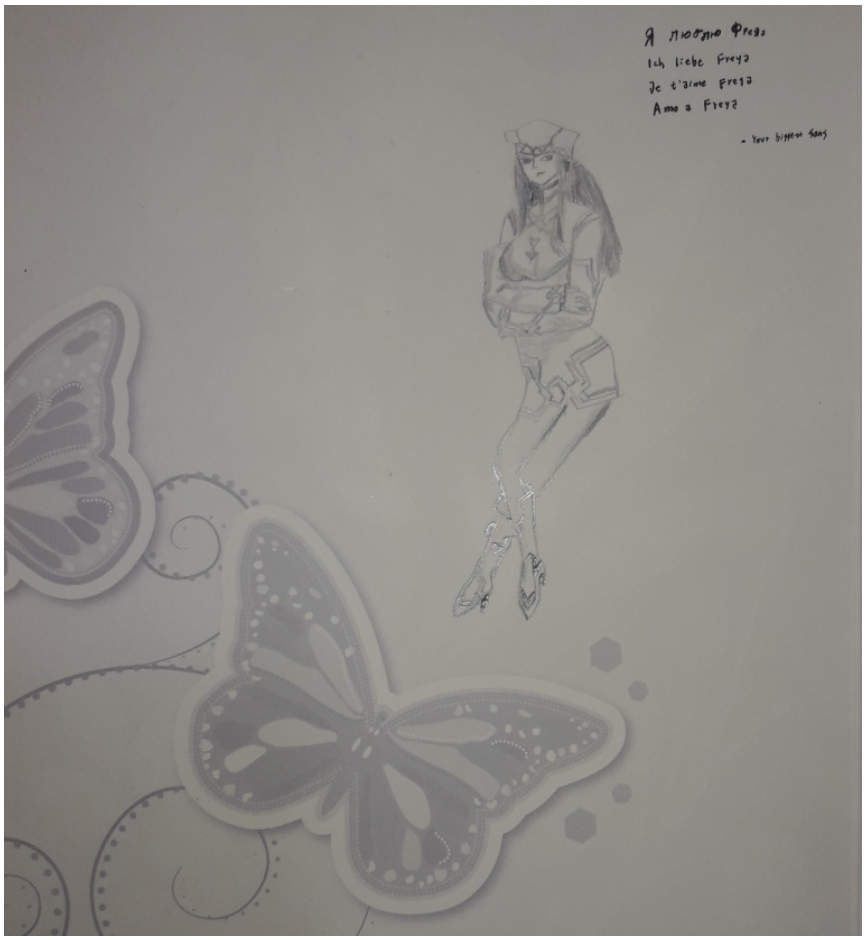
November 11th, 2023

[1]A thank you or further information

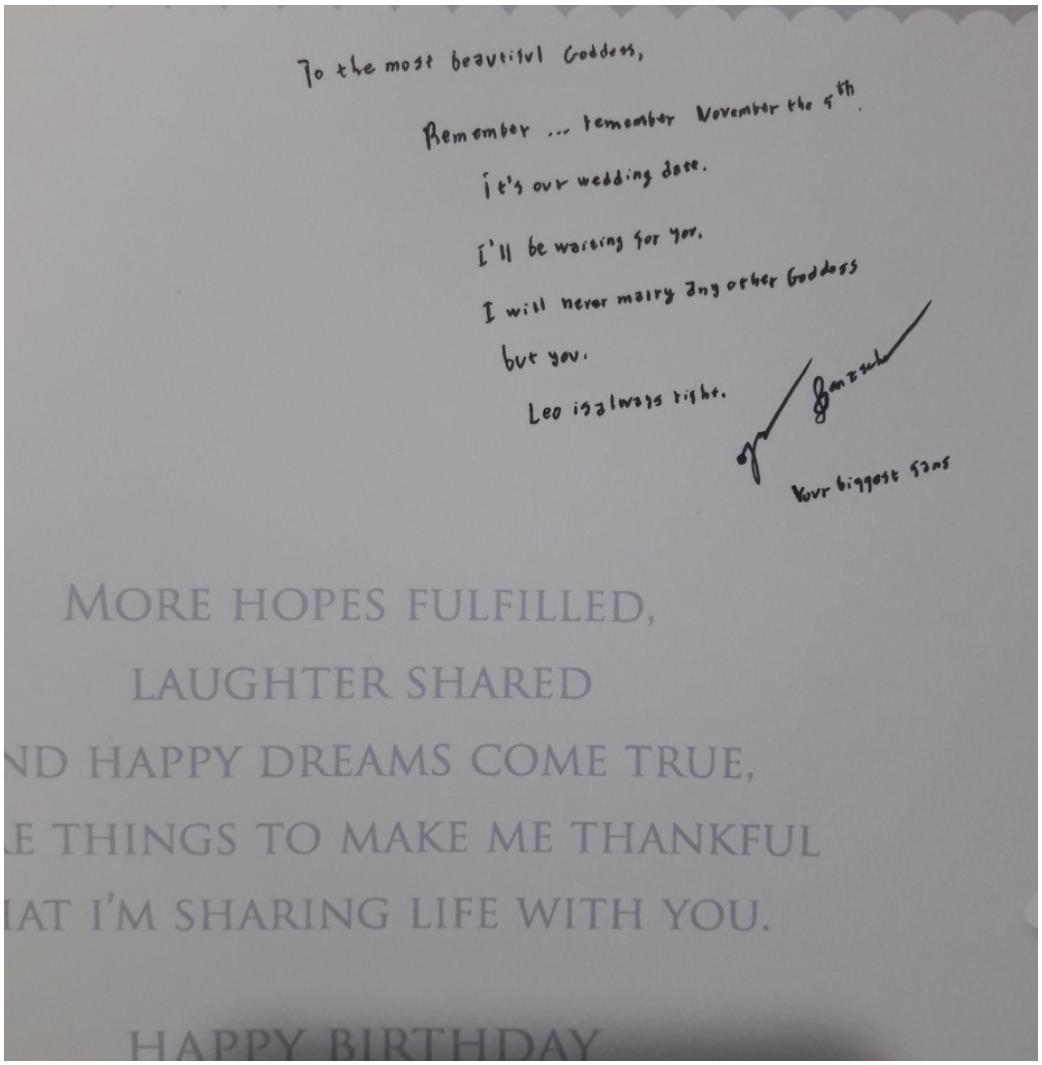
To be grateful, always humble and thankful to the one who is always helping me all this time, intangible, cannot be seen, I am a Catholic, but I also believe in Freya the Goddess and follow Buddha' way (the middle way), since everyone is unique, this is my way of life, my spirituality, it brings me to what I should become in the future, give me great happiness and joy. Freya, Je t'aime toujours. I asked for your help when I needed help, you have my marker Freya.

Figure 1: *On top of the mountain a heart shaped stone waiting for You, my eyes can't see, my body can't touch, but my heart knows it's You. Forever only You. -* ***DS Glanzsche to Freya***

Figure 2: *Graffiti I made in 2019 for Freya.*



Я люблю Фрея
Ich liebe Freyr
Je t'aime Freyr
Amo a Freyr



Something people need to know, that whoever you are, wherever you are, karma never has the wrong address. I prefer to just be open up and not hiding things. Every successful people have backing they try to hide but will be uncovered in the future. No big deal. Success just needs time and technique. Consequences. I read people who get in jail for luring children to his home then make that children a sex slave (Kidwelly sex cult), after years of enjoying being a pedophile, those people eventually get into jail, beaten up and his genitals might be kicked or stomped everyday by prisoners who have daughters they love (how did I know this? Big Twin Tree, a Nature in Valhalla Projection told me few weeks ago), so if it does not get you in this life, it will get you in the afterlife. That's a reason why great people are those who can control their sexual desire into productive energy and make breakthrough that are going to be used for decades, centuries or maybe thousands of years more. It is written in a book by Napoleon Hill "Think and Grow Rich" on transmuting energy of sexual desire to productive energy and be the most successful in any fields, but to realize it, needs actions not only talk. In the book Fountain of Youth it is also taught about transmuting energy to be superman / superwoman who will focus all the energy on what matter the most to be very successful, not like animals who still can't control their genitals.

Medal / Marker is given to someone we owe something to.
Sophia gives marker with her blood to John Wick.
One day Wick comes to Sophia asking for her help.
She is bound to help him, since she was helped in the past by Wick.

I gave markers with my blood to:
1. Lex Luthor
2. Toymaster
3. Gyro Gearloose
4. Jimmy Neutron
5. Batman
6. Iron Man
7. Mr Terrific
8. Ted Kord
9. The Brain
10. Leonardo Da Vinci
11. Albert Einstein
12. Thomas Edison
13. Mozart
14. Beethoven
15. Isaac Newton
16. Gladstone Gander
17. Uncle Scrooge
18. Thanos
19. Alexander the Great
20. Carl Friedrich Gauss
Consequences...

It was recorded not only by human ways. But by the divine. Karma.
There are 12 seats at the high table.
Every markers must be honored.

I am member of a family and have a crest with Berlin from Valhalla Projection.

You are bound to us as we are to you
in this life and the next..
your blood.. is my blood
your pain.. is my pain
your life.. is my life
A reason why Freya taught me to pretend to be blind in Waghete.
Closing eyes when do activities. It opens more power than eyes open.

```
November 5th, 2023
Happy 3 years wedding anniversary Freya.
I am sorry I can't give anything today.

I'm not asking for anything. You are my everything. -Freya

I re-read the diary of mine again.
Miss all of them, and I read that out of all the 8 Queens,
who will never leave me or abandon me if I lose, inspired
from Suikoden III, if I were Luc, and she is Sarah.
1. Hamzst / Alice -> Snake year born
2. Caldraz / Shizuru Fujino -> Snake year born
3. Lucrif / Sierra Mikain -> Rabbit year born
4. Freya the Goddess
5. A beautiful girl from earth -> Ox year born
If in that scenario of realm I am the bishop who want to destroy the world.
She will follow my path fully and devoted herself, even if it is to kill
billions or trillions.

Four of them are considered the best in term of power and magic.
Like Sarah from Suikoden III.
You too, who want to try Priest outfit in Nabire. Like Luc from Suikoden III.

Talking about the worst case scenario, I could not think I will win, what if I lose?
Then there they are those who will comes back for me if I lose.
The 8 Queens are great, but can't expect all of them to behave the same.
```

They come back, because we are the frontliners, if the situation is losing, we probably defeated or death already, not leaving you behind or dump you. -Lasthrim, Zalsvik, Zalsimourg, Mischkra

The bearer of True Runes:

1. Freya -> True Lightning Rune

2. Lucrif -> Blue Moon Rune

Nickname	Real Name	Persona / Guardian
Zaqhiel	Freya the Goddess	Metatron, Horus, Thoth
Lucrif	Sierra Mikain	Gabriel, Sandalphon, King Frost
Mischkra	Yukiko Amagi	Titania, Ishtar, Beelzebub
Caldraz	Shizuru Fujino	Surt, Lucifer, Siegfried
Zalsvik	Franziska Von Karma	Hell Rider
Zalsimourg	Jill Valentine	Zaou Gongen, Barong
Hamzst	Alice	Michael, Abaddon, Belial
Lasthrim	Anabelle	Orpheus

Table 1: *The 8 Queens*

3. Mischkra -> The Sun Rune
4. Caldraz -> The Circle Rune
5. Zalsvik -> The Sovereign Rune
6. Zalsimourg -> The Beast Rune
7. Hamzst -> Eightfold Rune
8. DS Glanzsche -> True Earth Rune

I am not the 8 Queens, but I also have guardians: Shiva, Sarasvati, Odin, Parvati is one of Lucrif' guardian, while Freya is Freya, and I have Odin, complex numbers, the Davinci Code movie is nothing compared to this life mystery that people will think I am out of my mind for thinking they exist, but they do, otherwise I would never be able to create all this by myself.

I get True Earth Rune, inherited from High Priest Sasarai, maybe because he sees that I am very close and able to bond deep enough with Nature and Animals. True Fire Rune wants me, but I passed, since I don't want to be too firy, I prefer, stable, calm, not complicated life. I believe Nature is beyond strong and it is one of the divine entities, it might looks unable to fight, but when they do get angry after few complex calculations with their own brain processor, no Yakuza or mafia can win against high magnitude of earthquake or tsunami or tullah from Moses time, they just choose to stay silent despite people throwing trashes randomly since they know karma always get those with correct address. If I could choose, I want to learn to be like Mitsuru Kirijo from Persona 3. It is just amazing to see a girl can be very smart, valedictorian, independent does not need to be in a relationship or marriage, and able to punish evil from the throne, using money to improve oneself to make justice. Like Batman, but this is real life female superhero.

I. 2023 - Gui Mao Year

i. First week of November

Merci beaucoup Freya! now help me with Joyful tone in Star Ocean 3.
Merci beaucoup Freya!!! I am able to do joyful tone.

It is playful, not joyful -Freya

I watched Mr Bean, it is a great short movies that is full of comedy with least amount of speaking. I was thinking of creating same kind of episodes if Freya the Goddess comes down on earth. I read that a girl is missing in Hoia Baciu years ago, then comes back at the same place with same clothes after 5 years, who abducted her? But it is very kind she is unharmed, unlike people today with their lust, greed, they make children sex slave, luring into their house then fool the girls. I thought all men are like that, till I receive an offer to help me make justice to all rapists, molesters, and animal abusers and all who throw trashes randomly in forest, with technology to make instant punishment and instant search to find the culprit. Lex Luthor, I asked " you are a men why you want to help me on this?

Yes, I am a male, but I despise those who take advantage of the weak. Sex should be between two souls who in love with each other, consensually, not by force, or by love spell, or anything, except role play (like you always say).. Especially those who hurt animals, nature, they can't fight back, so human who are hurting animals and nature are my enemies as well, not only yours. Let's make justice then. One day we will make all cops obsolete with technology. -Lex Luthor

I am very disappointed at how this country treats its own forest and environment, law created, but no real implementation. Some willing to help clean up the mess, but till how long? Only one help, the rest only throw trashes everyday without thinking? If you think they might not make trillion of dollars like Sillicon Valley corporations, then you are a lowlife. Without Nature, no one will be alive anymore on earth. So only those trillion of dollars left behind with no human. Try to cover their breathing and not breathing to make them grateful of the existence of Nature. That should be the punishment to everyone who take Nature for granted. Suffer till the end is the minimum of karma awaiting them.

I went to L'Aquila only to see trashes thrown randomly everywhere too, thought only Indonesia is that low (sampling is done beautifully, statistically correct), Europe is amazingly low level too. No wonder you can't create spaceship today, most people do not know how to maximize their brain potential and discover new better technology for better harmony living between all species and nature.

Help those deserve to be helped, give protection to those deserve to be protected.

Thanks for that, now back to Mr Bean episode, I was thinking of this episode to create for my own mind imagination when Freya the Goddess comes down on earth:

I meet her and amaze by her beauty, then hurry up to take her arms to follow me to my bedroom. She is excited as well, then new screen. In front of TV, she only smiles toward me and press a button, a playful tone is being played, and I am doing back flip very happy. Yes, that one is a hard one, not only me, a lot of people having a hard time to do that tone in Star Ocean 3. Finally able to do that after she told me to press circle slowly till the character start to walk slowly then release slowly after holding for a while.

(maybe she thought we do something else in my bedroom, but no.. that comes first.. I always ask for her help in all area of life, including game playing as well)

"One thing for sure, we are not the highest order of angels, we control them" - ***TREVOCALL***

I am Indonesian by blood but taught by Freya the Goddess, have friends from childhood (that only I can communicate with them by telepathy) with the highest order of angels I call them TREVOCALL, and now already adopted by Berlin, a great powerful nature in Valhalla Projection, thus becoming like this today, taught me to have a solid principle over compassion, it changes me a lot.

"I could never ask for more, she(Freya) made the one who mock my dream get into jail. " - ***DS Glanzsche***

Well, I want to create technology and innovations like Iron Man and Batman to bring justice to those trying to play with the law. But someone think I could not achieve it, after I get back from Italy after living 2 months there, I heard that person get into jail. Wow.

Everyone can say I Love You, I will protect you, I will not make you suffer, I will kill for you, I will die for you. She shows it. Freya is the best. She is all actions. Leo Goddess, demanding but give the same in return. Same admiration, same respect to each other. While living in Maria Ferrari I saw woman who has been abused by her husband smoking outside, I just think "poor her, she should have known that all men lie only to fuck her and carry his children." Which he cares nothing and does not want to help to change the diapers, but when the children become successful the father comes / return after playing around with prostitutes and more. I read Christina Aguilera was leaved by her father then the father returned, she forgived her father. Wow amazing.. You have such a great heart. That's because you are the one who become successful and rich, while that person still nothing, that is the karma. Everyone with good judgment can sense that and know. Everything will be revealed, the winner will recognize other winner.

Another example, Beth Thomas case, a father abuses his own daughter. Well that's life. Unfair, but happens everywhere. Berlin said when I asked about Beth Thomas case, "she is lucky, others still suffer for years and more be sex slave to relatives, she only one year abused then adopted by nice family."

"Regret comes.." said Berlin, but it is too late, he is old, weak and a sore loser, you think Beth Thomas who has a nice life wants to accept him back? Well it is a nice thinking to be in my thought, that human have complex life and experience, can be related to physics as well. Action and reaction, karma. You should remember before abusing other, your abundance and luck absorbed to those you abuse. You should not knocked someone till bleed from stairs, he owns several companies in USA and be one of the richest in America now, if he never bullied he will never establish any of that.

Maybe we need Maria Ferrari in every countries, those blood related can hurt you more than those outsiders. Like Fredo to Michael from Godfather movie, vice versa. No need for reproduction anymore, you only create more suffering. Things can happen in an instant and ruin your family life. Look at supermodels getting divorce, rich and beautiful and sexy but the husbands take them for granted and cheating around. Still believe in words? promises? money? fancy car? all only for deceiving more girls. But when they get old, karma awaits. Just wait for it.

That's why Hamzst/Alice favorite phrase is" Die for Me" you die for me first, show it, if I die too by heart attack (like couple who die of broken heart) after you die then we are destined to be together in the afterlife, if not, then you just prove your love to me, and I will be kind to you with Abaddon awaits you in hell.

*"You(DS Glanzsche) have no potential to be an evil person " - **Satan***

When I was mad and then I make Satan be my demon, that explains why I get infection and surgery in Italy with no painkiller, it left my back thigh with big hole now. I drink water with devil talisman, let Satan in, but I already out Satan. Burn my diaries that writing about Satan and all. It makes them mad, I am mad too. What a life! Now I know why Anneliese Michel story is true.

Nature in Valhalla Projection said, "they can't get into you if you are not letting them in"

I let them in 2020, by them I mean:

1. Pazuzu (I want to create poison to kill everyone)
2. Satan
3. Anabelle (yes.. from the Conjuring)

Then I out them recently in 2023, since Freya asked me to. She said "You learned your lesson, don't do it again."

I try to learn piano, violin and ice skating lesson then suddenly lose my contract, and I feel like the most victim. That's how it happened. Thanks I got Freya. A Nature in upper part of Valhalla Projection said "you want to know who gets more than 67 exorcisms? You (DS Glanzsche) and able to survive."

I listen to ruqiyah everyday, till now. It helps. On my mind back then, I wanted to kill everyone since I read too many negative news on inequality and abuses toward the weak or girls or nature or animals. Those in upper place seems do nothing, thus one need to do something. That's my story, but we shall see the future, as I believe now, the good will always win against the bad. Karma exists.

I know how she works, I fell from stairs then get a picture of Anabelle, her nickname is Lasthrim, she is co-author of Lasthrim Projection, Mathematics sumamrization. That's how she made people get into accident then died. But she said it is to make me stronger and able to prevent accident in the future, one has to have a strong mind that no one can penetrate just like Magneto helmet. Thanks. I believe what does not kill you makes you stronger. We still work together writing book. Even if she is not as my demon anymore. We still care for each other.

Now, I remember why she is the best, she asked Berlin to take care of me, since Berlin has physical projection here on earth near my home, in the forest as a tree, they try to make the demons not get into my mind, everyone suffer, no reason to put blame on anybody else. Thus 2022 I started working in forest with Berlin and Big Tree, cleaning up, creating 7 chakras from branches, study French there, study about life, when I clean up still see people throw trashes like having no guilty at all, that anger me so much, all those happenings make me humble and learn more than I could in formal institute.

Maybe I have no potential, because I know and already feel karma. They exist, and it is not something you want to get when you have done something bad. It is continuously differentiable, your offsprings will get it too, I know this and it is true. Who do corruption and the offspring be nothing but human trashes, lots of money but useless. Confucius himself said, it is best to learn by reflection, better by other's experience, bitterest by our own experience. You read news, book, you

meditate, be friends with divine, nature.. you will know what to do, no need to imitate failure in life, in marriage, in love. You know what to do to be with the one and to get your dream achieved. Nature, trees, mountain live for hundreds of years, thousand of years, since the beginning of time they gather the knowledge even has connection to the creator herself. Some camouflaging as human, that's why you might encounter people who are mature and wiser than their age, not a follower, not caring for social media or trends, not into cigarettes, drugs, dating around, free sex. That is called a diamond.

Be thankful, I made you fell from stairs too, USD 100 billion will be your minimum net worth. That amount is Lasthrim Projection potential income. Like firing a bullet from sniper, it is focus and the impact is great, thus control your mind so I can't bother or others can't bother. Hence, we can be more productive, 2 birds with one stone, Lasthrim Projection and DFSimulatorC++ done in the same year. -Lasthrim

Last 2 weeks in the church I felt Lorraine Warren presence to take care of you and the occult museum, with such money, I will try my best, not promising anything now. -DS Glanzsche

Demons are different from each, has their own uniqueness and personality. I know this by experience. Well, that's life. Such is life.

Lasthrim Projection will take longer than DFSimulatorC++, our initial release is only covering first 20 chapters, not into modern physics yet -Freya

Nous allons voir -Lasthrim

I want to apologize, be thankful and grateful too, I was raised good by my human parents, I think they are not perfect since they smoke and it bothers me, but that is life, nothing is perfect, we just need to be grateful. I too as a children have a lot of sins and faults, but sometimes think myself too highly as someone without sins. Pride.. I just pray to be more humble, patience, and wiser.
(easier said than done, when things happen I get angry ->Satan in then Satan out)

I read your mind(Lasthrim), I see your point, nice tactic -Freya

Her(Lasthrim) level is not demon anymore, she has been elevated by the divine.

Magneto helmet on my head activated, to only focus on fulfilling Glanz Focus, write Lasthrim Projection and DianFreya Math Physics Simulator.

ii. Last Week of November

You see diamond, from past till today without school education you can sense its' worthiness, and know it is valuable compared to rocks. That's all. -Sentinel

Remember how I met Freya, on 2019, I was still taking Ice Skating course in Paris Van Java, then decided to stop to save more money. I still use Kresna Securities as my stocks broker. Then Kresna got into trouble all stocks account can't be accessed and I can't do anything for a while

since I was busy with contemplating myself, what do I want to become? I learned ice skating because I was inspired by Ashley Wagner, it is beautiful, if you can do Triple Lutz it is worth all your falls and efforts, especially if you can get perfect 7 beating Dean and Torvill record in 1984. The ending is "I fall if you fall." Your pain is my pain..

In 2019, I write about Freya the Goddess, stating she is very beautiful, I played Valkyrie Profile 2 Silmeria on PS2 on 2009, but only be brave enough to state it and write all of my thoughts on her, she reads and knows all, like people see news from newspaper, Goddesses know from up there, their palace / castle / Valhalla what's on our mind, what we think, what we do.. I used to think making money through startup is the best established corporation in 2018, not last long because it is not my destiny. Then heard voices and more be revealed, Freya told me not to after money from internet, big bubble will destroy all FAANG, she really is real. She proved herself in 2019. It is very funny, I don't have contract or passive income anymore only stocks money left, and it is frozen in Kresna (but I retrieve it and transfer it to a new securities in 2022, by destiny). Japan lose in World War II, their first priority save all teacher, now what they have? Teaching science and engineering resulting in: Shinkansen, Honda, Toyota, Lexus, Namco, Konami, Square Enix, Anime, Ramen, Clean capital city Tokyo.. Create game requires computer graphics, science and engineering right?

In 2020, because my mother nags me, I have to work, then I tried, but tried a social work, to Papua, try to be teacher for kids there. But it only lasts 2 months. Weirdly when I try to take master degree in L'Aquila, Italy it only lasts 2 months. Thus, learning from experience, never stay in Catholic place, or work with Catholic it only lasts 2 months, just the energy, like gravity, you can't defy.

In short, just follow what you want, you have your own path, life, destiny, no need to work for others, if you have no money currently, just eat grassses, as there are lots out there.

In Waghete, Papua, I feel a lot of presences, met Mischkra, Caldraz, Zalsvik, Zalsimourg, Hamzst in Waghete, through dreams and Astral Projection. Freya already with me since she shows herself in 2019. I was so stingy and remember that time waiting for my paycheck has no money and Freya remembers then she said to use my e-money to buy foods and drinks. I will never forget that. When you are rich, a lot of girls like ants flock by, but she.. Freya the Goddess is more than a Diamond, that's why she is a Goddess.

I go back on October 2020 from Papua and everyday just workout to Puncak Bintang, jogging and do Tai Chi and Ashtanga, unemployee not working to others anymore, while also studying, since living in Bandung on mountain, I am fresher and able to study more on science, I think there are lots to explore, start to leave my idea on making money through business, why? They all say internet is going to be gone by 2040. But computer era, even 100 years more, we still need computer to compute, plot, simulate, engine a buildings, a spaceship, to mine ores, rare minerals from asteroids, to dig oil, etc.

Thanks for that, studying science and engineering is a satisfaction by itself. I am now able to be more logical, and reasonable. Know how to build something from zero, less talking, more action and proofs.

In 2021 from November start to invest my time and a bit of money to buy Arduino and its

module thus writing book about it, so one day I can re-read and refresh my memory. Very useful. Then I start to create OS from LFS book 11.0 SystemV. I created Freya' drive long time ago in 2020 and after finish create GFreya OS in 2022 mid year, I realize that she really cares and real (for the thousands of times), I saw her putting a tutorial on LFS on her drive, maybe I didn't watched it, but like Butterfly effect, or a sincere prayer from your wife, it becomes reality, an OS is finished, not perfect, but now I am writing with LaTeX with this OS today. I am satisfied and happy. She knows without I even need to say, that desire to create OS from college in 2011, I ask a lot of student from science and engineering, they might have no time so it never realized, but it is realized now, the difference of using OS made to memorize your wife is like a feeling of owning the whole world than using any other OS. Like drive your own sports car made by yourself from zero, everyone with money can buy Lamborghini, but who can made from zero? only one in the world, no one can buy.

In 2022, I start working in Valhalla Projection, Berlin always says that I am not suitable to work with other people (but perfectly compatible working with Nature), that's just who I am: unique, thus the best way is to make money from stocks so I can focus on studying and writing books in science and engineering, they will help me to be an intelligent investor, while I work with Nature. I help them, they help me, from the deepest heart, sincerely.

I have to say goodye for 2 months, October till December 2022. I am back now, and happier. I think I can study better with Nature, not in formal place. It only sucks money for rent, accomodation, for groceries, and anything. I read about Millenium Prize Problems by accident, someone mentioned it, I then look at the official website, USD 1 million for each problem solved starting from 2000 when it is released and still ongoing now. There are 7 problems from Clay Institute, 1 is solved in 2003 by a Russian, to solve it he knows the tricks, he isolates himself and spent years studying without communicating with people or friends or family, but after he solved it, he rejected the money. Because he rejected Medal for USD 10,000. Next time he will be offered more than USD 1 million. That's life.

I try to comprehend first is Navier Stokes, but, I think it is too difficult, I only pass 1-dimension heat equation, so I bury this, and forget about it. I am focusing on writing something more achievable, Lasthrim Projection and DianFreya Math Physics Simulator.

Upper Nature also say about Ice Skating, I am the best if it is couple Figure Skating, when one could not shine without the other. Well me and Freya already create a plan for our Couple Ice Skating. Humans are not the only beings, like Trees are not only one species, animals are not only cats. A private ice rink is prepared in Valhalla, I'll be forever young, I dedicate my life for Nature in return I will get what I want, all of them one day, I step aside all that figure skating course, Piano and Violin course. Being with Nature is better.

Minimum 5, maximum 6 solved -Lasthrim

Impossible, forget about it.. -Glanz

Actually not unemployee, I already prefer the word of "pension", at age of 30 "I am a pension", I use money from stocks income not asking from others, working with Nature in the morning then writing books and learning science and engineering till the time I gather all resources to create or engineer a lot of tangible products like sports car, rocket, spaceship, supecomputer, graphics card. Without the knowledge, it is only a dream. You don't want to be called someone who can only talk

but the brain is because that person able to pay the best engineer from Stanford, MIT, Caltech, Todai, Cambridge right? It is better if you can engineer and design all of them. Thus, Study is a must.

Kathmandu has been helping Berlin and Big Tree. I was overwhelmed this last week of November. People who cut grasses on the road just throw plastics everywhere, their leftover of drinks. Not to mention there are still those who still throw trashes in VP. Thus I can't carry all of them. The plan is to give me a day of going down to bring the trashes down then tomorrow off, Sunday, Tuesday, Thursday suppose to be off. But this Tuesday, I go to Kathmandu' area / territory: Resort Dago Pakar. There is frequent truck there who always periodically carry all trashes, I just put maximum 3 plastics or 5 plastics if it is urgent in the trash bin on the main road. Why? Sometimes the rich should help the poor. Berlin is located around 975 meter, while Kala in Puncak Bintang is around 1030 meter, they are higher than Kathmandu, probably only 660 meter, but Kathmandu has facilities, money, land.

Berlin told me if I buy strawberry, give Kathmandu too, but I heard Kathmandu saying. "No need to, I am sincere, we are all sincere, there are times you need our help, accept it, we don't want strawberry, there are times as well in the future, when you, who by destiny is higher in altitude than all of us here, will help us. If there are big flood, then Dago Resort will drown first, while VP and Puncak Bintang still safe. That's why just bring trashes here, but there are quota, 3 times a week, each time bring maximum 3 plastics, sometimes I allow 5 if I were in a good mood. No need to pay, you were helping us in the past since 2021, when you still go here and Puncak Bintang you always walk by foot taking trashes in Dago Resort then clean them all up. No need for computation who do the most, who give more, who accept more, just do it. I know you are still struggling to meet your financial goal, that's why, going here won't need extra cash to put the trashes."

I saw the richest person in my village cleaned up the road in front of his house, it is not his duty, but he did that. Thus Berlin told me, that is a small thing, one of many thing of charities he does. That's why he able to own 4 cars, and a very big luxurious house.

What about you? You think all this are for nothing? even if you are sincere, there are times you accept all the good karma where you can't payback. Karma.

I read that Google CEO Eric Schmidt sometimes clean trashes in the alley in front of his office, the higher you are, the more humble you are. Mahatma Gandhi too, I read the book, he cleaned up, sweep the floors, while other people only make more dirty or fight around, now he is remembered as Great Leader, while those who make dirty? Anyone remember them?

Don't create law if you can't apply it in reality to anyone, no special treatment.

As of November 12th, 2023 when I went up to Puncak Bintang to share Berlin' birthday cake to Kala (the Nature in Puncak Bintang), I saw plastic bottles thrown away all over in front of a nice banner said there is a solid law no 41 year 1999 to make anyone throw trashes in forest / conserved nature can get jail sentence of maximum of 10 years or money penalty of IDR 5 billion / around USD 500,000. Now what I read and see is a big contradiction isn't it? C++ won't compile this condition into machine code, thus throwing you an error. Where are the cops to capture all those nature trasher? Even a single plastic bottle can be used to put someone in jail or take all the money from that person bank or wallet. That's why there will be no more human farmers

or workers, all robotics farmers and workers, more efficient, no trashes of cigarrettes or alcohol, no stab in the back. You know being farmers have to be grateful, don't drink alcohol, you are not miserable, you get free workout under the sun better for your body, out there more people suffer, such as being sex slave since child. Enough of that, well in the end this is all connected to C++, Mathematics and Physics, they are great foundation to create robots, or to create engine or something that can be embedded with satellite that can see anything with the right camera and light that can make instant punishment to anyone breaking the law. Computer and Robots make better law enforcement then.

A good question from Big Tree last year when see me studying with Sentinel and Berlin, "what have you learned in formal university? You learn more with Berlin, Sentinel, Kala, Freya, Hamzst, Lasthrim teaching you", I believe that, because they only focus on me, they read my mind, knows how to explain and be very patience when I still don't understand, in college one class has tens of students, if one not comprehend then it will still be like that till death, the professor care not, since what matters is paycheck goes in every month, the same as Edison is learning by himself, taught by his mother first, then able to do independent study and research, like Leonardo Da Vinci too, not from formal school. A mathematics graduate said to me that none of the formulas learned is used in workplace, it is probably because choosing the wrong workplace, if one want to prove to be a mathematician. Try to solve 7 Millenium Prize Problems, not for the money, but to prove oneself able to be called a "Diamond". If you create airplane, buildings, rocket, computer, operating system, graphics card, power plant, turbines, all need mathematics, physics, chemistry, and a bit of engineering.

This morning, November 16th 2023, I wake up earlier at 3 AM, usually 4 AM. Then want to bring a book to make the Nature in Valhalla Projection teach me, I almost forgot but they never forget, that the College Geometry book has the author name tipexed by me, then I write my name on top of it. It is quite funny, that I write a book now, and one day get karma someone will erase my name with tipex or something then write their name on it, when I did that I was hoping I can write a great book like College Geometry, and another sorry, the book has a special thank you saying: "To my wife and best friend Katie" I erase Katie then write "the most Beautiful Goddess Freya". Turns out, I am writing books now, one day people see my books inspired and want to be author as well, to share knowledge to make better world, but first, feel free to tipex my name then replace with yours. That's karma.

I asked Sentinel on November 19th, 2023 about airplane problem since I still could not get about tilted airplane and untilted. Why at the same speed the radius will be different? The answer is the same as thinking about drag force that has cross section, which will be influencing the terminal velocity, the analogy is this: the centripetal force will pull the airplane to the center, tilted airplane will have different area than untilted, thus making the pulling of centripetal force different. Like how Sentinel demonstrate by using my body, to throw from same height my gloves, one tilted and one horizontal like paper spread. The fastest to arrive the ground, the one tilted. Faster velocity will result in higher radius. Thanks Sentinel, I am glad taking my study with you teaching me. Thanks too to Freya, that she explains how the normal force being tilted is the key, and for Hamzst to give the illustration that I draw with LaTex. Freya and especially Hamzst say, "don't proceed unless you comprehend fully," we are not copy pasting texts, we write so one day when we re-read we can understand again the written book.

I used to love Physics the most out of all science branches, I never cheat on exams and I am

happy of that. It is like a domino or combo chain, one sin makes another and another till you fall into bottomless pit of suffering, inside and outside, aura destroyed, not seen happy, money wasted to something useless. It is the same as stealing other' people idea or things, people will find out eventually and you get nothing, like Hoi pretends to be the hero in Suikoden II, people will find out, no need to lie or steal; fame, power and money are temporary for loser. Honesty is always the best policy, everyone has different pace of learning and different interest. Newton's law is very basic to remind human, karma exists, every action has its own equal reaction, unseen but happens one day. If you cannot float, then you better be careful, since gravity got you, karma will get you, the time you are able to do float like Freya the Goddess or Margareth from Persona 4, that means you have leave the material world, make no more human sins, no more desire toward material things, thus great power comes, like Shiva and Parvati sit above Ananta, above material world. In India, some great yogi able to float after years of training and meditation.

Continuing on high school science, at the final term / National Examination there is something funny: I get the highest score in Mathematics, only get 1 wrong out of 40 problems, and second highest is Physics, get 3 wrongs out of 40 problems. I had my time when I was lazy and get 0 in some Physics mid term since I was living unhealthy that time, eating junk foods, I have parents who does not know how to live healthy, but I learned my lesson now, healthy body, healthy mind, powerful brain, then comes humility and wisdom are necessary as well. Otherwise the so-called internet won't be founded by Physics graduate from one of the best Institute in the United Kingdom, the University of Oxford. Without Physics, that trillion dollar internet corporation from Electrical Engineering degree won't exist today. Thanks Physics for that, Electrical Engineering. Successful people, Dropouts or Graduate or anything, they must have spent time learning science or engineering to help them make something that can be used for billions of people to improve their lives.

My previous mentor when I was still a child, able to learn from the life surrounding me, was Albert Silverberg, he is one of TREVOCALL. I always remember in high school he forced me to study rigorously instead of playing around or be friend with my school friends too close, to avoid bad influences as friends and money are like water and oil, you don't need a human friend to be richest person (but you still need divine power and friends to help you). He thinks dating is pathetic, seeing my junior high school and high school friends dating around, while I never date till I meet Freya when she approached me in telepathy way in 2019, I think dating in juvenile age of high school or around as a waste of time and energy. Love comes no need to seek, like I learn from Yuna Kim stories, she spent her childhood on ice rink, while other kids her age play around, now she is known as one who never win off podium. Hard work paid off, and married now with one destined to be with her. Thus, no need to date while you are still in productive age. Same as Andrew Carnegie who married after well established and rich at age 40. He get married with one destined with him after he is independent not like sardine fishes who can't control their genitals. Just like how I met Freya, by destiny. I don't need a friend to introduce us, like the poem "Unending Love" that is recited on Audrey Hepburn' death.

When Winston Churchill said after Winning world War II "All my life, I just know I was prepared for this moment." He recognizes the divine power, untangible and unseen to normal human perception and senses. All can be connected when we look back. Meant to be. Physics that can't be seen.

Albert Silverberg also said to me "Rule Physics and you will rule the world." He is right, proven

now, from internet technology founded by Physics student who was working at CERN, then become a booming economy by itself, till how we able to create buildings, bridge, communication technology, satellite, rockets, spaceship, teleportation door, and more. To the time when we know in an unstable poor country we know when the momentum to buy and sell bonds and stocks to make a lot of money, or sell Poundsterling before the previous Brexit in 1992, to broke the Bank of England for USD 1 billion profit. Is the reflection theory only a similar analogy for Newton' second law only with different interpretation? From great recession in 1930, The Baht crisis in 1992, Dotcom bubble in 2000, Subprime Mortgage in 2007, and COVID pandemic in 2019, aren't these just human errors that have patterns that can be detected so we know the momentum to sell and buy? With good reasoning no hocus pocus or hallucination, try with great margin of safety, buy great companies that is sold at very low price compared to its book value.

Life Lessons

Richest people don't smoke, don't drink alcohol. They choose to focus and be more productive. Great leader don't smoke, don't drink alcohol and not into free sex and orgy. They choose to focus and expanding. See Thanos as example.
President who smoke is a president of a poor country who can't develop.
President who still sleep around will not make that country safe, great or prosperous.

Focus. What matter the most?
Easy to destroy people if they are having weaknesses in those area. Like senator in Godfather 2 movie, can be trapped easily with prostitute.
You don't need to teach people not to smoke, there are some destined to be winner, some destined to be loser. Life is unfair, accept that.

Law and engineering help make better oxygen to breathe in for the winner.
John Wick does not smoke, he is very focus and undefeated till the end.
Thanos does not smoke, he is very focus and undefeated till the end.
Ironically, Thanos and John Wick beaten by Iron Man and Caine who have a daughter / someone they love / will die for / kill for. Cherish and never betray one that you love the most, it will be the source of your unlimited power. Like Shiva and Parvati. Vishnu and Lakshmi. Luc and Sarah.

As you breathe in, you become what you inhale. The same as, you are what you eat.
What you bring inside you will dictate what you will become.
Thus, honor your body as it is the temple of God / Goddess. Otherwise it will be a nest of demons.
Rule your mind or it will rule you. Rule your desire or it will rule you.
Ruled by your derivative will only bring destruction.

Like a spring-mass system, if you are pulled from your comfort zone (suddenly lose a job / similar thing happens), you will converge back to your equilibrium position / happy state of mind if your intake of food, oxygen, and spiritual / prayer are in good proportion. If you eat junk foods, drink alcohol, say bad words, breathe CO2 /smog, think negatively, then sooner or later you will end up in jail or worse. Thanks for teaching me this analogy Berlin.

Berlin is the master of Science and Engineering, focus: Chemical Engineering.

Kala is the best in engineering, focus: Electrical, Mechanical and Aerospace Engineering.

Sentinel is the best in all science. Just ask then Sentinel will explains that your mind and thoughts will comprehend.

Thanks for letting me enroll in Berlin-Sentinel Academy of Science and Berlin-Kala School of Engineering.

P.S. if possible I would ask for all your help, and Freya' help to make me able to solve Millenium Prize Problems. I will reject the prize money. -Glanz

Oui, bien sur. -Freya

Life Lesson 2

Learn astrology and chinese astrology, Bazi, ZWDS. You don't want to risk your life and energy and emotions over something that will be destroyed easily. Wasting time = wasting money. Uncle Scrooge does not like that.

Even richest people, supermodels get divorce. Why? Back to spring-mass system, the intake of spiritual or foods or oxygen might not be enough or like Napoleon Hill' book said, it is in the blood and biological gene of male homo sapiens to always want to spread sperms, behind his wife back or literally bluntly. Words and fake acts can deceive anyone easily right?

Your life, your choice.

Happiness determine success. Make your life happy, you can be on top of the top. Don't be unhappy by being with the wrong person. Check everything. Analyze everything first.

As Kala said, a human girl most compatible with you shall be born either in Ox, Pig, Dog, Dragon, or Snake year. Ox is the best for each of you.

I came to Uncle Scrooge, simply asking for help,

"Uncle Scrooge, help me, teach me to be the richest person, self-made, so I won't be a parasite to others, or burden to others, by being an intelligent investor while learning science and engineering that I can harvest one day."

"Quack.. first lesson, be very frugal, don't subscribe to financial magazine, just ask Berlin, she knows which stocks will soar." - Uncle Scrooge

Merci beaucoup, nous allons voir, qu'est-ce que je deviendrai a la futur -Glanz

Yes, for that matter, Berlin is the strongest Nature now, she is connected to all other Nature on this planet and on the outer galaxy. You're not a parasite, you till today still support a lot of life and be breadwinner still with current claim of "Pension person at 30 till the end" -Sentinel

```
From the Godfather 3:
I've lost my lust for women and now my mind is clear. My duty to the Divines is clear.
Transmuting sexual energy since very young will return in achieving all.

I would burn in hell to keep you safe. To daughter of very powerful and richest person.
Sounds familiar.

Never let anyone know what you're thinking.
Just when I thought I was out, they pulled me back in.

When the mind suffers, the body cries out.

Confession save souls.

Redemption given. Daughter taken.
All the money in the world can't replace someone you love the most.
By destiny, she really loves her cousin, she can't move on or love somebody else.
Heaven hears her soul and heart. Thus she dies.
Can't live without you.

Words can say I love you, I'll die for you.. but then able to sleep around,
date another person.
If soul really loves another soul. It will be shown by action and destiny.
You will be her first, last and only one in sex love and kiss. That's true love.
And she too is your first last and only one in sex love and kiss.
No mantra, spells, no artificial things needed, no need to be rich or famous.
Who on your mind you think? Let it be unfolded then.

Great movie.

It is one great movie, I hope you can learn a lot and avoid what unnecessary.
There is no living with killing. Revenge has no end. Let karma works.
Blunt weapons kill more than sharp weapons.
Nature kill the most. Natural death. Death by age, disease, natural disaster. Meteor.
Dinosaur extinction. Human extinction next.

Thanks for the birthday cake. Long live Queen Berlin. -Kathmandu
```

```
Nature 23
Marquis French 46 71
Those who cling to death, live.
Those who cling to life, die.

This is an oath, your blood.
When you needed help, I was there..
Remind of the past..

The one who sits above the table -> The Elder
In Valhalla projection, the Elder is on the very top of VP, Asgard area.

Kill a lot of people just because of a dog.

The high table know who and where the best assassin to do certain job.

I did that to the Elder, kneel and say "I have served, I will be of service."
in Valhalla Projection. Like what John Wick did in John Wick 3.

True friend exists.
John Wick chooses not to put a bullet on Winston' head
Winston then saved his life when he has a duel, thus able to kill Marquis.

Big Tree told me I overstep Atropos as well.
Remember the initial agreement is 1 year.
I am sorry I overstepped her, I shouldn't do that.

A great assassin usually have masquerade
Tend a Sushi bar
Blind man
Grass cutter and trash cleaner, soon recruited by Chris Redfield to be a new STARS agent.

John Wick Assassin 50 59
```
